

# GET ACCURATE LOCATION IN REAL-TIME WHENEVER YOU WANT

FULLY WIRELESS WITH LONG BATTERY LIFE

## DEVICE FEATURES

### Intelligent Tracking Device

- GPS, cell tower triangulation & Wi-Fi location
- High performance Built-in Antennas
- Periodic or movement-based location reports
- **Track On-Demand Location Remotely**

### World Class Cross Platform Tracking Application

- Advanced Tracking platform in multiple AWS regions & availability zones
- Optimized Fleet, User and Customer Management Experience
- Smart Alert System using push notification, SMS and Email

### Energy Efficiency

- Super Enhanced battery life using our proprietary selective location determination algorithm
- Backed by our Patented next generation wireless IoT connection, power management and security technology

### Cutting Edge

- Wireless CAT M1 modem/processor
- High performance GPS & cellular antennas
- IP 67 Water and Dust Proof
- Designed, developed and manufactured in the USA

# Technical Specifications

## Location Connectivity

- GPS Fast Location
- Wi-Fi Location Assistance
- Wi-Fi Geofencing
- Cell Tower Triangulation

## Hardware

- Nordic Semiconductor NRF9160 wireless CAT M1 modem/processor
- High performance GPS & cellular antennas
- Multiple Quick and Covert installation options
- Built In Magnetic Backside
- IP 67 Water and Dust resistant

## Batteries

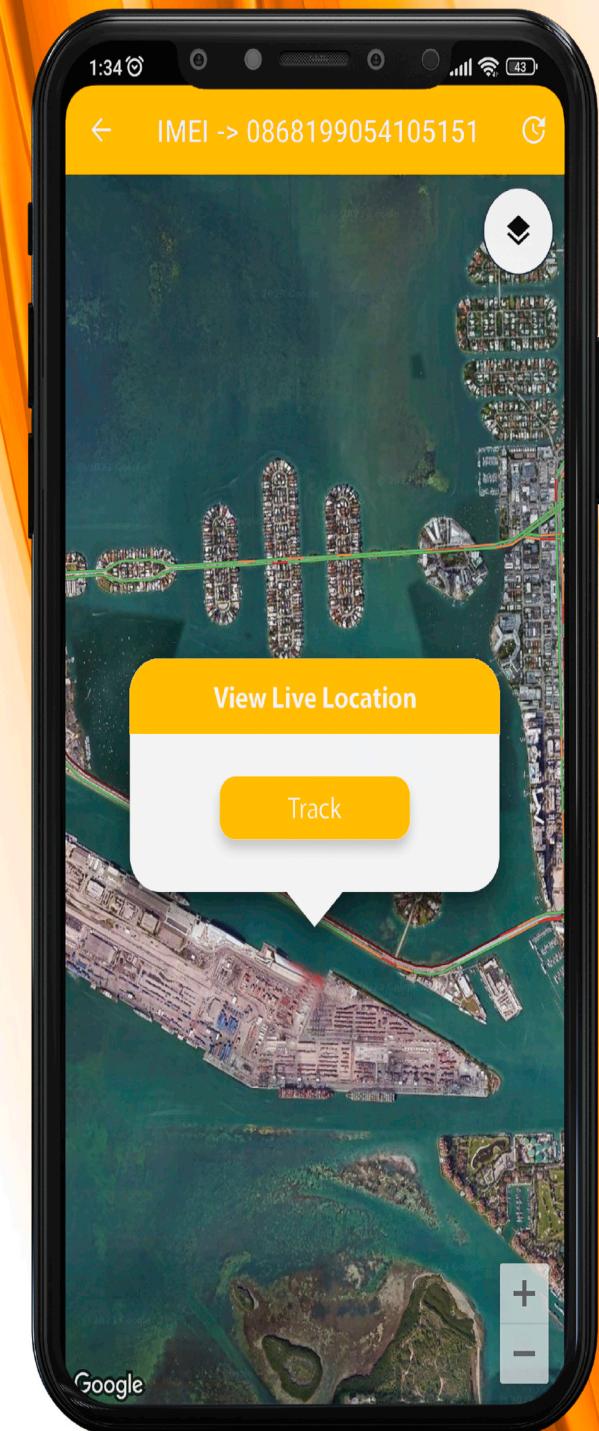

- Patented technology for ultra-low power and ultra-long battery life
- 8000 MAH battery with ultra long stand by time

## Made in the USA

- **Designed, developed and manufactured in the USA**

**Add another Layer of Security to a Mobile asset with an undetectable wireless tracking unit that gives on demand tracking to secure your personal or business assets.**
